EDUCATION

PhD in Economics

University of Nottingham

Oct. 2021 – Present

Nottingham, U.K.

MRes in Economics (Top student in cohort)

University of Nottingham

Oct. 2020 – Sep. 2021

Nottingham, U.K.

Diploma in Machine Learning and Deep Learning

Instituto Tecnológico de Buenos Aires (ITBA)

2019

Buenos Aires, Argentina

Master in Economics (Best dissertation)

Universidad de San Andrés

2019

Buenos Aires, Argentina

B.A. in Economics

Universidad de San Andrés

2011

Buenos Aires, Argentina

RESEARCH INTERESTS

Applied Microeconomics, Behavioral Economics, Applied Economics

JOB MARKET PAPER

Heads in the Sand: Theory and Experiment on the Interdependence of Information Avoidance [PDF](#)

with Silvia Sonderegger and Fabio Tufano

We study whether the deliberate avoidance of information that is freely available and instrumentally useful is interdependent across people. Agents derive direct utility from anticipating their future, state-dependent consumption, potentially creating incentives to avoid information that induces such anticipation. Building on Bénabou (2013), our model predicts that when remaining ignorant imposes negative externalities on others' prospects, individuals' decisions to acquire or avoid information may exhibit strategic complementarities (making ignorance contagious), strategic substitutabilities (making it self-limiting), or be unconditional. We test these predictions in a novel experiment where participants choose whether to learn a payoff-relevant state and where remaining ignorant worsens a future payoff common to all group members. Consistent with contagious ignorance, exogenously increasing expectations about the prevalence of information avoidance raises participants' own propensity to avoid information, on average. The contagion of ignorance appears mediated by a deterioration in anticipatory utility upon learning bad news—which become even worse news when ignorance is more prevalent. Individuals vary substantially in their best-responses to others' informational choices: around 40% of subjects condition their informational choices on those of others, split evenly between strategic complements and strategic substitutes. The mixture of such strategy types affects equilibrium share of information avoiders monotonically and nonlinearly. Our findings suggest that optimal incentive schemes aiming to promote the aggregate take-up of information should account for interdependencies in informational decisions.

Discrimination with Inaccurate Beliefs and Confirmation Bias [PDF](#)

with Christian Ruzzier. *Journal of Economic Behavior and Organization* 210 (June 2023): 379–90.

We examine patterns of discrimination when employers hold incorrect beliefs about the relationship between group membership and productivity, and suffer from confirmation bias when updating their beliefs. As a result, employers

do not correct them fully, leading to persistent wage discrimination. Negative stereotypes generate discrimination against minority workers upon entry to the labor market, but are not enough to have discrimination in the long run, and reversals in discrimination are possible. We also discuss whether interventions aimed at reducing discrimination would succeed if confirmation bias is an important source of discrimination, and consider segregation in an extension with heterogeneous employers.

PROFESSIONAL EXPERIENCE

Mercado Libre

Buenos Aires, Argentina

The leading tech company in Latin America ([More Info](#) )

Data Scientist, Marketing Science

Mar. 2020 – Aug. 2020

- **Big Data Analytics:** Processed 900M+ monthly transactions (e-commerce & fintech) in SQL, and implemented marketing analytics and visualizations in Tableau across 18 countries.

Samsung Electronics

Buenos Aires, Argentina

Product Manager, Product & Marketing, Digital Appliances Division

Mar. 2016 – Feb. 2020

- **Cross-Functional Leadership:** Managed a \$35M product portfolio (50% of division revenue) by leading product and marketing strategy and partnering with cross-functional teams across Latin America and Asia, aligning sales, marketing, supply chain teams.
- **Best Employee Award:** Overcame several external delays in product development to achieve on-time launch of air conditioners (with demand concentrated in 2 months) by shortening critical path of logistics by 1 month, securing 15% of division's annual revenue target.

Supply Chain Management Coordinator, Digital Appliances Division

Mar. 2013 – Mar. 2016

- **Operational Excellence Award:** Achieved >90% Forecast Accuracy (vs. 70% target) and > 90% Sales Target Accuracy, key results contributing to the subsidiary's Global Operational Excellence Award for 16 consecutive months.

TEACHING EXPERIENCE

University of Nottingham

Nottingham, UK

Teaching Associate

Oct. 2025 – Present

Economics Dissertation (supervision, computing classes, tutorials), Politics of Economics, Experimental & Behavioural Economics.

Postgraduate Teaching Assistant (PGTA)

Sep. 2021 – Jul. 2025

Introduction to Microeconomics, Quantitative Methods, Applied Econometrics I & II, Politics of Economics, Experimental & Behavioural Economics, Economics Dissertation.

Universidad de San Andrés

Buenos Aires, Argentina

Top Economics department in Argentina 

Invited Professor, Department of Economics
Behavioral Economics

June 2022 – Present

RESEARCH EXPERIENCE

IZA / University of Bonn

Bonn, Germany

Research Visit. Host: Professor [Florian Zimmermann](#)

May 2025 – Jun. 2025

University of Nottingham

Nottingham, UK

Research Assistant for Professor [John Gathergood](#)

Jul. 2023 – Nov. 2023

- Project on gender inequalities in academia in the U.K. Used parallelized webscraping with Python's `beautifulsoup` library to build database of about 88,000 U.K. research outputs and their authors. Used a Machine Learning algorithm to classify authors' gender based on first and middle names.

Research Assistant for Professor [Valeria Rueda](#)

Nov. 2021 – Sep. 2022

- Project on [the effect of political activism on women's electoral participation](#). Webscraped and built database of the universe of U.K. parliament speeches on gender and the woman's suffrage movement from 1910-1914 (11,700 speeches) in Python. Implemented text-analysis.

CONFERENCES / PRESENTATIONS

2025: Field Days (LISER), IZA Applied Lunch seminar (IZA), CCC Meeting (University of Amsterdam), Midlands Empirical Economics Workshop (University of Leicester), Applied Micro Group (University of Nottingham), CeDEx Brown Bag (University of Nottingham)

2024: Copenhagen Network of Experimental Economics (CNEE) Conference, CeDEx Brown Bag (University of Nottingham)

AWARDS & CERTIFICATIONS

Academic Awards

- **Best PhD student presentation**, Year 2. PhD Annual Conference, University of Nottingham, 2023.
- **Best Performance in MRes** in Economics (ranked first in cohort), University of Nottingham, 2021.
- **RIDGE-Nottingham Scholarship**: full funding for 5 years (awarded to only 1 student from Latin America).
- **Best Dissertation in Master in Economics** (selected from 40+ eligible theses), Universidad de San Andrés, 2019.
- **Teaching Excellence Award**, University of Nottingham, 2021/22 and 2022/23.

Industry Awards

- **Best employee award** for “outstanding behavior and valuable contributions to business”, Samsung Electronics, 2017 (among 200+ eligible employees).
- **Global Operational Excellence award** (key contributor for award at subsidiary level), Samsung Electronics, 2016.

Certifications / Courses

- “Foundations of Machine Learning”, University of Oxford (taught by Maximilian Kasy), Sep. 2024.
- “Chicago School in Experimental Economics”, University of Chicago (John List et. al), Sep. 2025 (online attendee).
- “Behavioral Field Experiments” PhD course, ESA, Hanken School of Economics (Leonardo Bursztyn et al.), Aug. 2024.
- “Randomized Controlled Trials”, Barcelona School of Economics (Owen Ozier & Pamela Jakiela), Jul. 2023.
- “Gender Economics”, Paris School of Economics, Jun. 2023.
- “Statistical Learning in R” (with distinction), Stanford University, Mar. 2020.

TECHNICAL SKILLS

Econometrics, Machine Learning & Data Science: Python, Stata, R, SQL

Experiments & Surveys: Qualtrics, Lioness.

Version Control: Git

LANGUAGES

Spanish (native) | English (proficient) | Korean (intermediate) | French (basic).

SERVICE

- Volunteered to improve work environment and inclusion at Samsung Electronics by providing Korean culture induction to Argentine new hires, enhancing cross-cultural understanding and preventing frictions at work for 20+ new employees annually.
- PhD Representative, [Centre for Decision Research and Experimental Economics \(CeDEx\)](#), 2024-2025.
- Co-organiser of CeDEx Brown Bag seminars, 2022-2024.
